

HELIFLITE SECURES XTI TRIFAN 600 VTOL EXCLUSIVE DISTRIBUTORSHIP FOR OCEANIA, INDONESIA AND THE PHILIPPINES

Leading edge US aerospace company XTI Aircraft is at the forefront of redefining air travel with their breakthrough six seat aeroplane. The TriFan 600 will offer the speed and luxury of a business jet while have the convenience of take-off and landing of a helicopter.

"This is a major development for XTI," said XTI Chief Executive Officer Robert LaBelle. "We're pleased to be working with Heliflite on an exclusive basis in this part of the world. They've been providing sales, service and spare parts support to the helicopter industry and other aircraft owners since 1977, and have earned an excellent reputation."

A part of the agreement Heliflite will provide engineering and maintenance services for the TriFan 600, as well as an important role in XTI's pre-sales and sales program. The exclusive arrangement covers Oceania, Indonesia and The Philippines.

XTI recently announced it had successfully completed initial hover tests of the TriFan 600 prototype, which tested the vehicle's autonomous functions and ground control systems, including the electric motors, the battery system, ducts, propellers, flight controls, electrical systems and instrumentation. Future flights will test forward, wing-borne flight, as well as the transition phase between vertical and forward-flight modes.

XTI has already an impressive 80 reservations for aircraft, from customers on six continents, and also announced approval of its design and utility patents, recruitment of top industry executives, and strong supplier relationships.

The TriFan is a major breakthrough in aviation and air travel. It will travel at 550 kilometres per hour, with a range of up to 2,200 kilometres. Using three ducted fans, the TriFan lifts off vertically. Its two wing fans then rotate forward for a seamless transition to cruise speed and its initial climb.

It will reach 29,000 feet in just ten minutes and cruise to the destination as a highly efficient business aircraft.

Heliflite is proud to be associated with XTI's highly experienced design and management team and looks forward to being instrumental in the TriFan 600's success in our region. For further detailed information regarding the XTI TriFan 600 please contact Heliflite's Sales & Marketing Director Robert Bentley-Johnston on 0403 196 219.

HELIFLITE DELIVERS 14th NEW ROBINSON TO THE O'NEILL FAMILY

Congratulations to Sophie O'Neill on taking delivery of her family's 14th new Robinson helicopter from Heliflite. Sophie's father Max first took delivery of a new R22 Alpha in 1984 and has been operating his machines over the last three decades for agricultural applications in north-western NSW. Heliflite greatly thank the O'Neill family for their ongoing support and business.

HELIFLITE YOUNG EXPLORER AWARD RECOGNISES OUTSTANDING MEDICAL RESEARCHERS

Congratulations to Dr Maria Findeisen from the Garvan Institute of Medical Research on winning the Heliflite Young Explorer Award. The Heliflite Young Explorer Award recognises the Garvan Institute's two most outstanding early career researchers by facilitating international travel to conferences and laboratories to foster their career development. In further recognition, Heliflite had the pleasure of taking Maria for her first ever Sydney harbour flight. Maria's medical speciality is in the development of drugs to treat obesity-induced metabolic disease. Last December, she travelled to the 18th International Congress of Endocrinology in Cape Town, South Africa to present her work. The second recipient of the Heliflite Young Explorer Award went to Dr Nathan Zammit who specialises in Immunology. The second recipient of the Heliflite Young Explorer Award was proudly presented to Dr Nathan Zammit who specialises in Immunology. Nathan used his award to spend 8 weeks at the University of Alberta in Edmonton, Canada for further research.

Beat the end of financial year with Heliflite's helicopter sales and spare parts/overhaul kits
